| | Phase 2 WorkLoad | All the following items MUST be implemented as FUNCTIONS in the appropriate class | Total weight |
|---|---|---|---|
| | Eval Criteria for each item ==> | 60% (Code quality&understanding), 20%(integration with team members), 20%(Run) | 10.5 |
| Feature No. | Function | Details | Rel Weight |
| 1 | Main Simulation Function in class Restaurant: | -->Load into action list then<br>-->Main loop call functions to<br>{check available scooters/tables,<br>check finished order,<br>Assign stage 1,<br>Assign stage 2,<br>collect statistics and update print screen }<br>--->call to produce o/p file. | 0.5 |
| 2 | Load input file into ACTIONS_LIST | | 0.25 |
| 3 | Move from ACTIONS_LIST to All Pending lists | for Request Actions only | 0.25 |
| 4 | Handle Cancellation Actions | | 1 |
| 5 | Check Scooters lists | check Maint_Scooters and Back_Scooters to Free_Scooters | 0.75 |
| 6 | Check finished Delivery orders | At the point of time of deliver the order (the scooter didnot return yet) | 0.5 |
| 7 | Check finished Dine-In orders | | 1.25 |
| 8 | Assign pending to a chef | | 1 |
| 9 | Move from Cooking_Orders to Ready Orders | | 1 |
| 10 | Assign table | | 1 |
| 11 | Assign scooter | | 0.5 |
| 12 | finalize takeaway orders | | 0.25 |
| 13 | Collect statistics/Print screen/Generate the output file and support silent mode too | | 1.25 |
| 14 | Prepare 6 non-trivial input files with their outputs | | 1 |
| ---- | ---- | CancelOder( ) for both Pend_OVC(), RDY_OV()<br>getBest() for all 3 table types.<br>Update print screen | 0 |

| | | | |
|---|---|---|---|
| | **Bonus Part** | | **10%** |
| | **Order overwait for Ready OVG only** | | **3%** |
| | **Rescue Scooter** | | **3%** |
| | **COMBO Orders** | | **4%** |
| | | | |
